Beakers with flat flange
 Related Content Product Q&A # of Reviews ★★★★★

Purpose:
 S1 – MAIN is found in the vwr.com global header. It's purpose is to drive users to products they are searching for. The advanced filter feature within Search S1 – MAIN allows them to select a specific set of data to search against.

ELEMENTS

1. Search (S1) MAIN

1a. Advanced Search & icon
 The user needs to know what advanced search function they are using. Keyword is default.

When the user selects an advanced search, the search box text will indicate how to conduct the search. **(see example 1ab.)**

1b. Advanced dropdown

- Keyword is default
- **Supplier Name**
- Part Number
- CAS number
- Chemical Formula
- MDL number
- Merck Index
- Molecular Weight
- Chemical Name or Synonym
- Safety Data Sheets
- Certificates of Analysis

1c. Search Text Box

- Keyword, Article Name, Reference Number, Category

- Type Ahead feature calls categories and keywords

- The dropdown list **Bold EVERYTHING** that matches

1d. Button CTA

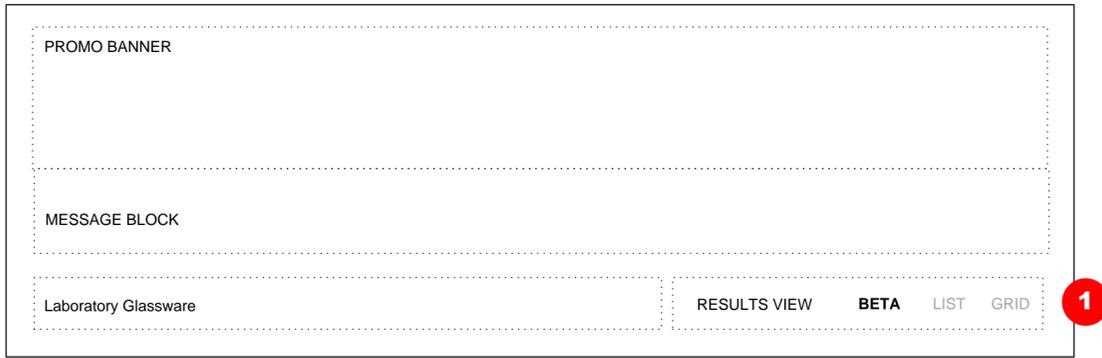

2. PRODUCT DETAIL (variant)

2a. S2 – PRODUCT

Note: The same features & functionality span across both S1 & S2 and will render to the same search results. The only thing that's different is it's text area & visible character count

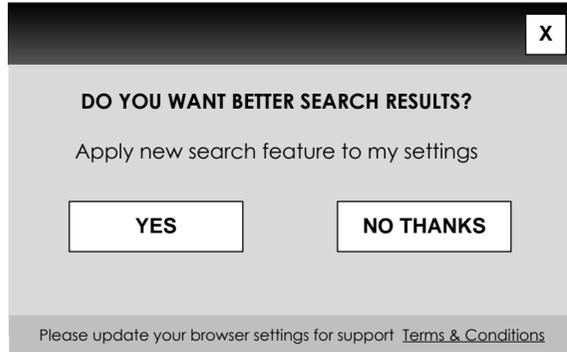

Use Case:

Not Logged In – Search Results for Laboratory Glassware

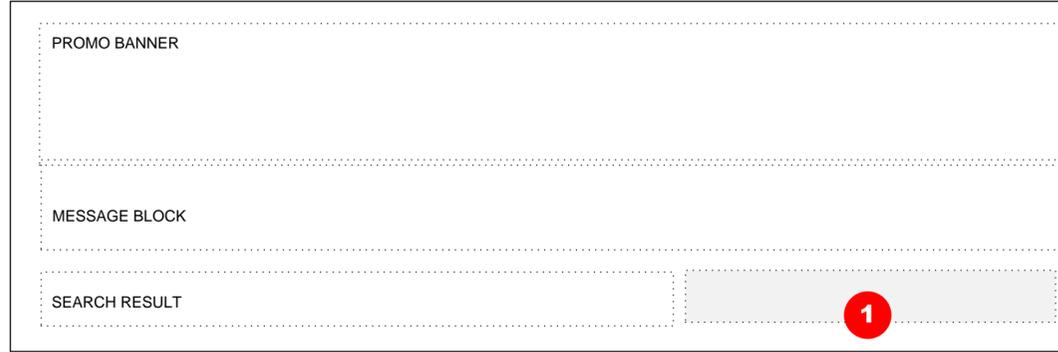

Use Case:

Logged In users are messaged about the new feature and can apply the settings in their account prefs.

Use Case:

If true, consider removing the tool from the template

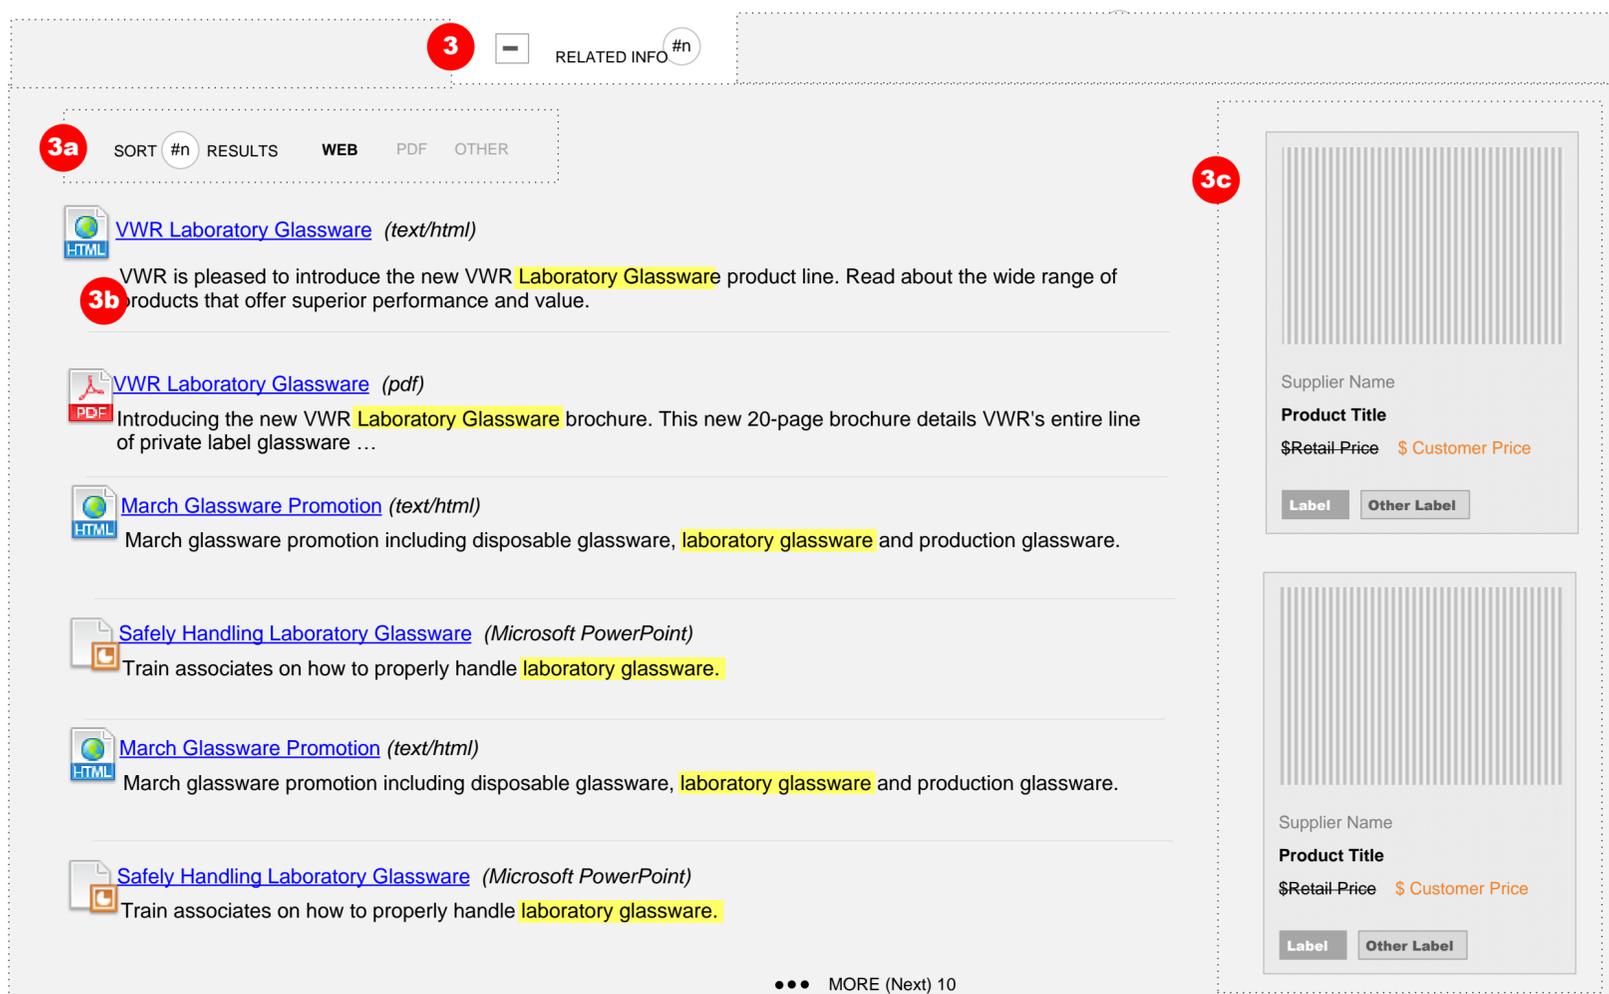

Use Case:

User Selects method to sort the results

Use Case:

User Selects Related Info

PURPOSE:

Give users a set of tools and features to interact and refine their search results. Allow users to switch result views, add to cart, compare, & sort results.

1. RESULTS VIEW

- Allow non-logged in users to select their results view with a visual cue (UI) in the search results template.
- When the user switches the view, the new template style is displayed

2. SORT RESULTS

- Allow users to SORT the search and family results. When selected, the results are **sorted according to**:
 - Best Match – Default
 - Product Name (A-Z)
 - Product Name (Z-A)
 - Supplier Name (A-Z)
 - Price (Low – High)
 - Price (High – Low)
 - Top Sellers (#units sold)

3. RELATED INFO FLYOUT ZONE

- Display all search related articles in the toggle / flyout UI. The flyout UI will Hide #2, (Sort Search Results), "Comparison Widget", and "Add to Basket" with a z-index value in the CSS

http://www.w3schools.com/cssref/pr_pos_z-index.asp

3a. SORT RESULT TITLES BY TYPE

- For **HTML pages**, use the page Title (in HTML header <title> tag) for the link text.
- For **pdf documents**, use the "Title" from the document properties. If title is blank, use the file name.
- For **"Other", Word, Excel and PowerPoint** documents, use the "Title" from the document properties. If title is blank, use the file name.
- **WEB Hyperlink** links user to the document or page, opens a new window

3b. RESULT SUMMARY

For all mime types display a block of text that is made of:

- 15 words prior to the first match of the keyword/phrase in body of the document
- The matching keyword/phrase
- The next 15 words after the keyword/phrase. Begin and end the summary with an ellipsis.
- **Example:** ...VWR is pleased to introduce the new VWR Laboratory Glassware brochure. This new 20-page brochure details VWR's entire line of private label glassware for general...

3c. RELATED DEALS

- Promotion id'd as a targeter for the category
- Each category create content – banners
- Target display

BEST MATCH V

RELATED INFO #n

NOTHING TO COMPARE COMPARE #n

5 ADD TO BASKET T

Add to Shopping List
6 Export to PDF
Send to a Colleague

PURPOSE:

- Allow users the ability to compare search results, add to basket/cart, send to a colleague, export to a pdf, and add to shopping list applications

4. COMPARISON ZONE

- Clicking "Add to Compare" on a specific search result adds the product here at the top of the page.
- Selecting the "compare" tool will display a toggle
- When the limit of products to be compared in the system is reached, message the user that they have reached their limit.
- The button becomes visible and active when the user selects 2-4 products to display in the toggle window. The number of products added to the compare widget is visible as a notification
- The toggle behavior is consistent with the related information toggle.

5. ADD TO BASKET

- Clicking "Add to Basket" validates that user has entered at least one quantity.
- Shopping basket widget is updated if no errors.
- Success is displayed in page message block.

OPTION A:

Display in the original position in search results.

OPTION B:

Display in bottom right corner of the toggle.

6. CART TOOLS

- **Add to Shopping List** – Adds the quantity values and product data to the users shopping list
- **Export to PDF** – Exports the quantity values and product data to a pdf.
- **Send to a colleague.** Exports the quantity values and product data into a unique URL for the colleague to access via a received email.

10% available for \$200 purchase

PURPOSE:
Allow users to modify results into smaller and wider sets of using a separate search tool and refinement application.

GENERAL BEHAVIOR:
Users can make selections that will render new result sets, and close selections, rendering previous results sets.

- + **Use Case:** Expand
- **Use Case:** Hide
- ☐ **Use Case:** Select
- X **Use Case:** Removal Tool

COMPONENTS & ELEMENTS:

- SHOWING X OF Y RESULTS**
 - Total Number will match the number of records the user has searched for in the original query, and will change as their search path is applied.
- S3 - SEARCH REFINER**
 - Search within the current result set for the keyword(s) entered. Results are refreshed on the page, key=enter, button refreshes the results.
 - Searches within the existing query. Keyword & Cat#
Note: Type Ahead popular keywords within the index record
- VALUE PROP**
 - Allow a space for high level user related messaging related to search. (optional)
- EXPAND ALL CRITERIA TOOL**
 - Give the user the option to see all of the search related filters and attributes they can choose & or apply. This will open all.
 - Fix the left navigation at supplier on scroll.
- FAMILY PRODUCT CATEGORIES**
 - 5a.** Display All Categories from STEP associated with PIM Family open by default
 - 5b.** Select category from the list and apply the results
 - 5c.** Remaining category names are (hidden) behind the (expand / collapse)
 - 5d.** The user sees highlighted selection directly beneath Category facet. A removal tool is displayed next to that category
- APPLYING ATTRIBUTES**
 - Any selection made by the user is collected at the top of the left nav, stands alone, or in a cluster of selections.
 - The attributes become visible when the index record picks up one or more products with the attribute tag.
 - Attributes use a right facing chevron and are based on true and false values
 - If categories is turned off, the search result returns to the family search result page. (see 5a)

Types

Materials

Capacity

Sources

PURPOSE

- Allow the user to choose and apply attribute settings to their search. The attributes and their display are dependant upon their structured product data.
- When the attributes are turned on and off the user will see a new set of results based on their choices.

APPLYING FILTERS

- Uses Plus and Minus icons to open and close
- Display all filters with 3 or less available choices open. For example, "Sources" is open by default

1. Types – on-off
2. Materials – on-off
3. Sources – on-off (open by default) 2 choices:

- Market** (for custom catalog customers (logged in status) – this is highlighted with selected color which is applied in the admin center
- Other** – all other products picked up by the index records

4. Capacity – Slider -ranges are defined as the lowest to highest based on the index records available.

APPLYING TRUE FALSE ATTRIBUTES

5. Availability – applied by default
6. GSA
7. Environmentally Preferable (EPP)
8. Diverse Suppliers (MWBE and SBE)
9. Clearance

- These attributes can be applied in a true or false case. They use a right facing chevron and are applied to searches when the index record picks up one or more products with these attributes in the search results.
- The user will click on these available attributes and the selected box will appear at the top with a removal tool to de-select.
- The Search results will apply these true false attributes to existing search queries to drill the total result set down.
